

## Labeling Service Specifications

**Specifications:** Please refer to the diagram below

- a. Inner diameter size (core) = 3"
- b. Outer diameter cannot be larger than 12" (2,000 to 3,000 labels per roll)
- c. Web width = 2" to 6-1/2"
- d. Labels needs to have a gap between 1/16" to 1/8" (between, left & right)
- e. NO perforation on the liner. If the label is die cut, the die cannot go through the liner.
- f. Label image direction must be bottom out. All labels must be aligned.
- g. NO clear liner.

- NO clear labels.
- When packaging labels, please make sure the inner core is not damaged and the labels are rewound tightly.
- Only ONE label design per roll. Front & Back labels cannot share the same roll.
- Try to use resealable/reusable tape to secure the labels on the roll.

### **IMPORTANT!** Read Before Printing Your Label!

Before you submit artwork to your printer for mass production, please send us a PDF of your artwork to review. We highly recommend the width of your label be at least 1/4" less than the width of the bag. When applicable, please inform us of your preferred valve location. All label application jobs are final and cannot be returned or exchanged. For more detailed information, please contact your sales representative.

*I have read and understand the label requirements above. (If you are not the Label Company, you are acknowledging that this information will be forwarded to the person in charge of printing your labels.)*
